REASONS FOR ALLOWANCE

The claimed invention of monitoring multiple outputs of a SMPS is found to be allowable over the prior art since such a method comprising the steps of initiating a first time delay after enabling at least a first of the SMPS outputs and the output(s) is/are within a predetermined range, initiating a second time delay after enabling at least a second of the SMPS outputs and the output(s) is/are within a predetermined range before the first time delay is over, asserting a single "power is good" status signal when the second time delay is over, and deasserting the single "power is good" status signal when at least one of the outputs is not within the predetermined range was not found to be singularly or collectively taught by the prior art.

The TPS51020 data sheet cited by applicant was perhaps the best reference however this application and that reference are commonly owned by the same company, Texas Instruments, and both documents were filed or published at the same time, July 2003.

Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably accompany the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeffrey L. Sterrett whose telephone number is (571) 272-2085. The examiner can normally be reached on Monday-Thursday & 8:00am-5:00pm.
